

Lucent Bio

# DESIGNED TO DELIVER: SEED COATINGS

Seed Coatings Designed to  
Deliver Nutrition, Not Plastic.

Empower microbiomes to deliver nutrition and  
enhance crop growth while sequestering carbon  
in a circular economy.

# Unveiling the Power of Sustainable Seed Coatings.

Lucent Bio's cutting-edge seed coating technology is changing the way we grow crops, ensuring a more sustainable, productive, and food-secure future.

## Designed to Deliver:

### Crop Performance

Unlock top yield potential with Lucent Bio's high-performance seed coatings, fueling exceptional growth and yields.

### Sustainability

We are committed to preserving the environment by promoting circular economies to provide a healthier future for generations to come.

### Environmental Stewardship

Lucent Bio's seed coatings optimize nutrient uptake, minimize runoff, and safeguard ecosystem biodiversity without harmful substances and microplastic residues.

### Scientific Excellence

Experience the transformative power of our innovative solutions with tangible benefits in crop productivity, soil health, and carbon sequestration.
